The Keyholder's Ledger

Securing Family Assets Before They're Needed

Chapter 1

Most families can't say where their deeds, policies and account details are kept. This book walks you through building one trusted ledger of everything that matters, and deciding who holds which key.

Every family has a story about the day something went wrong and nobody knew where to start. This chapter looks at asset mapping and why it matters for continuity. If you were unreachable tomorrow, who could find your property papers? Reflect on this before moving on, and note one thing you could change this week.

Every family has a story about the day something went wrong and nobody knew where to start. This chapter looks at key custody and why it matters for continuity. If you were unreachable tomorrow, who could find your property papers? Reflect on this before moving on, and note one thing you could change this week.

Every family has a story about the day something went wrong and nobody knew where to start. This chapter looks at document locations and why it matters for continuity. If you were unreachable tomorrow, who could find your property papers? Reflect on this before moving on, and note one thing you could change this week.
